## Second Decade Voyages:

Maritime Exploration in the Age of Discovery, 1415-1800 Ronald S. Love, 2006-09-30 Despite earlier naval expeditions undertaken for reasons of diplomacy or trade it wasn't until the early 1400s that European maritime explorers established sea routes through most of the globe's inhabited regions uniting a divided earth into a single system of navigation. From the early Portuguese and Spanish quests for gold and glory to later scientific explorations of land and culture, this new understanding of the world's geography created global trade, built empires, defined taste and alliances of power, and began the journey toward the cultural, political, and economic globalization in which we live today. Ronald Love's engaging narrative chapters guide the reader from Marco Polo's exploration of the Mongol empire to Ferdinand Magellan's circumnavigation of the globe, the search for a Northern Passage, Henry Hudson's voyage to Greenland, the discovery of Tahiti, the perils of scurvy, mutiny, and warring empires, and the eventual extension of Western influence into almost every corner of the globe.

Biographies and primary documents round out the work. Voyages on the Northern Sea Route Tadeusz Pastusiak, 2019-09-04 This book explains vessels' ability to overcome ice on the Northern Sea Route as well as the criteria of safe speed and maneuvering of vessels on ice. It provides a successful long-term forecast of ice navigation and reveals the dangers of sailing on the Northern Sea Route. It includes tips on how to plan and schedule voyages in the Russian Arctic. The book develops a set of suggested routes for the period of opening and closing of the transit ice-free zone through the NSR based on the last eleven navigation seasons. It presents a method for determining the date for beginning a voyage of a vessel without ice strengthening through the NSR. It also develops a model of initial long-term and operational decision-making support system for vessel voyage planning and scheduling. The main audience for the book are officers at operational and management level of competency, people planning voyages on the Northern Sea Route in the office of ship operator and in chartering department or consulting company, and participants of Ice Navigator IMO Model Courses at basic and advanced level of competency.

**Empire And Others** Professor M. Daunt, Rick Halpern, 2020-09-10 Much has been written about the forging of a British identity in the 17th and 18th centuries from the multiple kingdoms of England, Scotland, and Ireland. But the process also ran across the Irish Sea and was played out in North America and the Caribbean. In the process, the indigenous peoples of North America, the Caribbean, the Cape, Australia, and New Zealand were forced to redefine their identities. This text integrates the history of these areas with British and imperial history. With contributions from both sides of the Atlantic, each chapter deals with a different aspect of British encounters with indigenous peoples in Colonial America and includes, for example, sections on Native Americans and Early Modern Concepts of Race and Hunting, and the Politics of Masculinity in Cherokee treaty making, 1763-1775. This book should be of particular interest to postgraduate students of Colonial American history and early modern British history.
