Landscape Infrastructure Ying-Yu Hung, Gerdo Aquino, Charles Waldheim, Julia Czerniak, Adriaan Geuze, Matthew Skjonsberg, Alexander Robinson, 2012-11-05 Infrastructure is a much discussed topic within the field of landscape architecture. It regards the entire urban and rural space as a network that calls for an integrated planning and urban design approach. Natural and man-made infrastructures are viewed as forming a single overarching whole. The book examines this robust and ecologically sustainable approach with essays by well-known experts in the field. It also documents 14 international case studies by SWA landscape architects and urban designers among them the technologically innovative roof domes for Renzo Piano's California Academy of Science in San Francisco, the restoration of the Buffalo Bayou in Houston and several master plans for ecological corridors in China and Korea. Other projects develop smart re-use concepts for railroad tracks that no longer serve their original purpose such as Kyung Chun railway in Seoul or Katy Trail in Dallas. All projects are described extensively with technical diagrams and plans. The publication offers ideas for reinventing, repurposing and repositioning infrastructure as a viable medium for addressing issues of ecology, transit, urbanism and habitat.

**Vademecum** Klaske Havik, Kris Pint, Svava Riesto, Henriette Steiner, 2024-04-12 *Vademecum 77* Minor Terms for Writing Urban Places offers a set of concepts that stimulate new approaches in planning, architecture, urban design, policy and other practices of spatial development. These diverse concepts might reveal blind spots in urban discourse or bring insights from one discipline to another. The term minor refers to the ambition to look at the local and social specificity of urban places and to challenge established discursive frameworks by giving voice to multiple actors in the debate. Sustainable Educational Leadership and the Climate Crisis Alexander Gardner-McTaggart, 2025-03-26 Challenging conventional leadership models, this timely and pioneering volume offers a critical rethinking of educational leadership in the context of global crises, particularly climate change and social inequality. Chapters introduce transformative approaches that prioritise sustainability, social justice and collaboration by critically examining historical and philosophical foundations of current educational leadership through a blend of scholarly analysis and practical insights. Qualitative international data used in this book lend insight into educators' lived perspectives. This book introduces thinkers such as Habermas, Serres, Foucault, Heidegger and Anders on knowledge generation as applied to educational leadership. This book challenges neoliberal and patriarchal models of leadership that dominate the field. It offers innovative frameworks such as degrowth and political ecology to address the pressing issues of climate change and social inequality. Ultimately, this book champions critical thinking as a tool for leadership and a resource for leading and will be of use to researchers, scholars and postgraduate students interested in leadership, strategy, sustainability, education, training and leadership and the theory of education more broadly. Those involved with higher education management and philosophy of education will also find this book of value. Economic Geographies Ray Hudson, 2005-02-09 Integrating ideas of structure, agency and practice, this volume provides a detailed overview of recent

*Pragmatic Naturalism* Richard J. Bernstein, 2020-08-18 Richard J Bernstein argues that despite the apparent chaotic debates about naturalism there has recently been a series of powerful arguments that support a version of naturalism that is in the spirit of John Dewey s pragmatic naturalism After presenting a sketch of Dewey s pragmatic naturalism he critically examines the works of a variety of thinkers Robert Brandom John McDowell Richard Rorty Wilfrid Sellars Peter Godfrey Smith Philip Kitcher Bjorn Ramberg David Macarthur Steven Levine Mark Johnson Robert Sinclair Huw Price and Joseph Rouse to show how they have contributed analytic finesse to the articulation of Dewey s vision of pragmatic naturalism As Bernstein shows Dewey s philosophical legacy is very much alive today in some of the best recent philosophic discussions

**Nietzsche's "Ecce Homo"** Nicholas Martin, Duncan Large, 2020-12-16 Friedrich Nietzsche s intellectual autobiography Ecce Homo has always been a controversial book Nietzsche prepared it for publication just before he became incurably insane in early 1889 but it was held back until after his death and finally appeared only in 1908 For much of the first century of its reception Ecce Homo met with a sceptical

response and was viewed as merely a testament to its author's incipient madness. This was hardly surprising since he is deliberately outrageous with the megalomaniacal self-advertisement of his chapter titles and brazenly claims 'I am not a man I am dynamite' as he attempts to explode one preconception after another in the Western philosophical tradition. In recent decades there has been increased interest in the work especially in the English-speaking world but the present volume is the first collection of essays in any language devoted to the work. Most of the essays are selected from the proceedings of an international conference held in London to mark the centenary of the first publication of *Ecce Homo* in 2008. They are supplemented by a number of specially commissioned essays. Contributors include established and emerging Nietzsche scholars from the UK and USA, Germany and France, Portugal, Sweden and the Netherlands.
