Coming Home to the Third Reich Grant W. Grams, 2021-09-14 During the 1930s Germany's industrialization rearmament and economic plans taxed the existing manpower forcing the country to explore new ways of acquiring Aryan German labor Eventually the Third Reich implemented a return migration program which used various recruitment strategies to entice Germans from Canada and the United States to migrate home It initially used the Atlantic Ocean to transport German speakers but after the outbreak of World War II German civilians were brought from the Americas to East Asia and then to Germany via the Trans Siberian Railway through the Soviet Union Germany's attack on the Soviet Union in June 1941 ended this overland route but some Germans were moved on Nazi ships from East Asia to the Third Reich until the end of 1942 This book investigates why Germans who had already established themselves in overseas countries chose to migrate back to an oppressive and authoritarian country It sheds light on some aspects of the Third Reich's administration goals and achievements associated with return migration while also telling the individual stories of returnees *The First Summit* Theodore A. Germany and the Axis Powers from Coalition to Collapse R. L. DiNardo, 2005 It seemed that whenever Mussolini acted on his own it was bad news for Hitler Indeed the Fuhrer's relations with his Axis partners were fraught with an almost total lack of coordination Compared to the Allies the coalition was hardly an alliance at all Focusing on Germany's military relations with Italy Romania Hungary and Finland Richard DiNardo unearths a wealth of information that reveals how the Axis coalition largely undermined Hitler's objectives from the Eastern Front to the Balkans Mediterranean and North Africa DiNardo argues that the Axis military alliance was doomed from the beginning by a lack of common war aims the absence of a unified command structure and each nation's fundamental mistrust of the others Germany was disinclined to make the kinds of compromises that successful wartime partnerships demanded and because Hitler insisted on separate pacts with each nation Italy and Finland often found themselves conducting counterproductive parallel wars on their own DiNardo's detailed assessments of ground naval and air operations reveal precisely why the Axis allies were so dysfunctional as a collective force sometimes for seemingly mundane but vital reasons a shortage of interpreters for example His analysis covers coalition warfare at every level demonstrating that some military services were better at working with their allies than others while also pointing to rare successes such as Rommel's effective coordination with Italian forces in North Africa In the end while some individual Axis units fought with distinction if not on a par with the vaunted Wehrmacht and helped Germany achieve some of its military aims the coalition's overall military performance was riddled with disappointments Breaking new ground DiNardo's work enlarges our understanding of Germany's defeat while at the same time offering a timely reminder of the challenges presented by coalition warfare *Forthcoming Books* Rose Army, 1988-09 **England** Litellus Russell Muirhead, 1957 **Bibliographic Index**, 1989 **Yachting**, 1953 **Hell in Hürtgen Forest** Robert S. Rush, 2001 Some of the most brutally intense infantry combat in World War II occurred within Germany's Hurtgen Forest Focusing on the bitterly fought battle between the American 22d Infantry Regiment and elements of the German LXXIV Korps around Grosshau Rush chronicles small unit combat at its most extreme and shows why despite enormous losses the Americans persevered in the Hurtgenwald meat grinder On 16 November 1944 the 22d Infantry entered the Hurtgen Forest as part of the U S Army's drive to cross the Roer River During the next eighteen days the 22d suffered more than 2 800 casualties or about 86 percent of its normal strength of about 3 250 officers and men After three days of fighting the regiment had lost all three battalion commanders After seven days rifle company strengths stood at 50 percent

and by battle's end each had suffered nearly 140 percent casualties. Despite these horrendous losses, the 22d Regiment survived and fought on due in part to army personnel policies that ensured that unit strengths remained high even during extreme combat. Previously wounded soldiers returned to their units and new replacements green to battle arrived to follow the remaining battle-hardened cadre. The German units in the Hurtgenwald suffered the same horrendous attrition with one telling difference: German replacement policy detracted from rather than enhanced German combat effectiveness. Organizations had high paper strength but low manpower and commanders consolidated decimated units time after time until these ever-dwindling bands of soldiers disappeared forever: killed, wounded, captured, or surrendered. The performance of American and German forces during this harrowing eighteen days of combat was largely a product of their respective backgrounds, training, and organization. Rush's work underscores both the horrors of combat and the resiliency of American organizations. While honori
