**Science, Religion, and God** Adriana Muller, 2013-03-05 There is only one God yet religions are plenty In Science Religion and God author Adriana Muller unites science with religion and explains God from a scientific point of view She discusses how religions were created by gods who were wealthy people protected by armies people who believed that because of their wealth they were invincible and omnipotent Their armies protected their wealth by killing all who wanted a bit of it The gods believed they talked to God but they were ill God doesn't talk doesn't write and doesn't hear voices because God is not human Science Religion and God communicates if you want to be heard by God you have to speak with your soul not with your lips because God doesn't read lips You have to pray from your soul because your soul is part of God's soul When you pray with your soul you pray with love and God created everything and everybody with love from the deepest of God's heart and from the heat and light of God's soul Science Religion and God unites all religions it is the connection between sun and soul soul and love and soul and money
