Pre Llano Cultures Of The Americas Paradoxes And Possibilities:

A Prehistory of South America Jerry D. Moore, 2014-07-09 A Prehistory of South America is an overview of the ancient and historic native cultures of the entire continent of South America based on the most recent archaeological investigations. This accessible, clearly written text is designed to engage undergraduate and beginning graduate students in anthropology. For more than 12 000 years, South American cultures ranged from mobile hunters and gatherers to rulers and residents of colossal cities. In the process, native South American societies made advancements in agriculture and economic systems and created great works of art in pottery, textiles, precious metals, and stone that still awe the modern eye. Organized in broad chronological periods, A Prehistory of South America explores these diverse human achievements, emphasizing the many adaptations of peoples from a continent-wide perspective. Moore examines the archaeologies of societies across South America, from the arid deserts of the Pacific coast and the frigid Andean highlands to the humid lowlands of the Amazon Basin and the fjords of Patagonia and beyond. Illustrated in full color and suitable for an educated general reader interested in the Precolumbian peoples of South America, A Prehistory of South America is a long overdue addition to the literature on South American archaeology.

Archaeology in Latin America Benjamin Alberti, Gustavo G. Politis, 2005-08-16 The first overview of current themes in Latin American archaeology, written solely by archaeologists native to the region, making their collected expertise available to an English-speaking audience for the first time.

Pre-Llano Cultures of the Americas Robert L. Humphrey, Dennis J. Stanford, 1984

Taphonomy and Archaeology in the Upper Pleistocene of the Northern Yukon Territory Richard E. Morlan, 1980-01-01 The concept of taphonomy has been borrowed from paleontology and applied to the analysis of vertebrate fossils from the Old Crow region of the northern Yukon Territory. By means of this approach, archaeologically significant specimens have been isolated from the larger suite of materials which can be explained entirely in terms of natural processes. The analysis indicates that human occupation began in eastern Beringia more than 50 000 years ago and probably was continuous from that time onward, but primary archaeological deposits will be needed to clarify the historical and paleo-environmental significance of these finds. Published in English.

The Indigenous Paleolithic of the Western Hemisphere Paulette F. C. Steeves, 2021-07-2022 Choice Outstanding Academic Title The Indigenous Paleolithic of the Western Hemisphere is a reclaimed history of the deep past of Indigenous people in North and South America during the Paleolithic. Paulette F. C. Steeves mines evidence from archaeology sites and Paleolithic environments, landscapes, and mammalian and human migrations to make the case that people have been in the Western Hemisphere not only just prior to Clovis sites 10 200 years ago but for more than 60 000 years and likely more than 100 000 years. Steeves discusses the political history of American anthropology to focus on why pre-Clovis sites have been dismissed by the field for nearly a century. She explores supporting evidence from genetics and linguistic anthropology regarding First Peoples and time frames of early migrations. Additionally, she highlights the work and struggles faced by a small yet vibrant group of American and
