Pre Famine Ireland Social Structure:

Pre-Famine Ireland Desmond Keenan, 2018-12-20 This book describes the social and economic conditions in Ireland during the first half of the nineteenth century that is up to and including the Great Famine It is concerned about particular issues like the Catholic emancipation or the famine but looks at Irish society as a whole Central and local government are described the economy agricultural and industrial the churches the educational system the medicine the arts the music and the sports It aims at presenting as complete a picture as possible Ireland at the time **PRE-FAMINE IRELAND: SOCIAL STRUCTURE** Desmond Keenan, 2001-03-07 The companion volume to this one is now almost ready This book deals with the social and economic aspects of Ireland in the pre Famine period The second volume Ireland 1800 1850 deals with the political history of the same period This book Pre Famine Ireland grew out of a project I undertook after completing my doctoral thesis to read a copy of one or more Irish newspapers for every day between 1800 and 1850 This not only gave me contemporary perspectives on the period but also provided a wealth of information not otherwise readily available Information for example on the courts on the duties and responsibilities of officers like mayors and sheriffs how they were appointed to whom they were responsible and who was responsible for seeing they conducted themselves well who conducted schools what was taught in them who managed schools for girls long forgotten religious disputes and so on It had been my intention to write a single volume on the history of the period but the vast quantity of data I collected on social and economic conditions compelled me to gather it into a separate volume The subject is so vast that in the course of a single volume only the barest outline of each topic can be given There is no room for recounting different interpretations among scholars that belong more appropriately to more specialist publications My aim is to provide a hand book for the general reader or general student of Irish history but also one into which the specialist may dip concerning matters not of their speciality The period 1800 to 1850 in Irish history has not been particularly frequently or well researched Distortions too were caused by the political objectives of the various writers Facts were selected omitted or twisted to suit political objectives Catholic or nationalist writers wrote with their own religious and political objectives in mind and Protestants or loyalists likewise Historians concentrated on the political struggles and conflicts omitting investigation of other aspects of society particularly the social and economic conditions and practices of the time Some of these have long since vanished Others are still with us but very much altered Local government for example was drastically altered in the second half of the century Some people too know institutions and customs only in their British or American forms Nowadays for the most part historians take a much more objective approach and the study of social and economic history has been developed Social and economic institutions were well developed in Ireland in the early nineteenth century It was not a primitive country or yet one where a native population was ground down by colonial oppressors The people Catholics and Protestants regarded themselves as living in a free and democratic country There might be more freedom and democracy in America but they

considered that what they had was more suitable for their country and congratulated themselves on having escaped the excesses of the French Revolution Very few after 1800 looked for a republic There was a free press and letters to the editor were particularly illuminating There were great political struggles between Catholics and Protestants but these were very similar to those between Republicans and Democrats in the United States later in the century violence and all Catholics in the nationalist party in Ireland and Catholics in Tammany Hall in the United States came from the same families It was not an anti colonial war There were troubles and disturbances without doubt Society was very unequal and many rewards went to those already rich But there was equality before the law and equality in business Attempts were always made to remedy real grievances and numerous commissions of enquiry were appointed Reliance was normally placed on the ordinary processes of the law Extraordinary measures to deal with outbrea

Post-Famine Ireland: Social Structure Desmond Keenan, 2006-11-28 Irish society and economy is studied objectively in this book as if it were a society in a distant region or in the distant past The distortions of nationalist anti British propaganda are removed In particular the failure of the various separatist movements to devise an ideology which could unite and rally all the people of Ireland behind them is described Ireland is analysed as a sociologist analyses societies and using the materials that a sociologist uses Irish society is placed in the context of its time and place It was one of the societies on either side of the North Atlantic Ocean These countries were all to a greater or lesser degree developing their industries improving their roads building their railways extending their trade enlarging their towns and cities deepening and expanding their ports and modernising their institutions Though religion was strong in all of them new currents of thought often derived from the American and French Revolutions were being spread everywhere It was largely an English speaking society and its institutions were those of common law countries As this study shows Ireland was a typical member of this group of nations It was not the most advanced but it was far from being the most backward Some of the Nordic countries for example were only beginning to follow Irelands path of development There is no evidence that membership of the United Kingdom hindered or retarded this development The Irish however being closely linked to England always compared their progress with that of England which was a mistake The 19th century was Englands century as the 15th century was Italys What caused the Industrial Revolution where handcrafts gave way to the production by machinery to occur earlier in England than elsewhere is a subject that fascinates historians How England came to possess the largest empire in modern times is another fascinating question Why English institutions a free press a parliamentary democracy religious tolerance methods of education and most modern sports came to be imitated is another one The fact was that in the 19th century great parts of the world looked to Britain to see how they could modernise their societies and improve their economies Ireland did likewise and from an earlier date but never so successfully Why Ireland was not as successful as Britain is not easily explained Lack of coal and iron is not the explanation for some of Irelands leading industries like linen shipbuilding rope making and tobacco manufacture were developed from imported

materials Likewise in England industries which depended largely on craftsmanship like the pottery industry flourished Nor was Ireland's backwardness relative to England caused by oppressive law or restrictions for within the United Kingdom all operated under the same rules Nor can the Catholic religion of Ireland be adduced as a cause for most Irish businessmen were Protestants It is not the purpose of this book to ask or settle these questions but the simpler one of describing the facts of Irish society as it was and to remove the distortions of propaganda When one studies the actual facts it becomes clear that not only was Ireland neither oppressed nor backward but was actually one of the most advanced countries in the world at the time as progress was understood in the 19th century Ireland by 1850 was already a well developed modern society more advanced than most countries in Europe The period up to 1920 was one of increasing prosperity and increasing social improvement Every new development in the various aspects of society industry agriculture communications science and education social improvements were all adopted In this book I concentrate on the achievements that Irishmen can be proud of One can look at Irish industrial achievements Belfast showed how ships on the North Atlantic run should be built and fitted out The greatest linen industry in the

Anthropology and Sexual Morality Carles Salazar, 2006 The history of sexual morality in Ireland has been traditionally associated with repression In the last two decades however repression seems to have given way to its exact opposite But where did this repression originate And how can we account for this sudden and sweeping transformation in sexual mores Based on solid ethnographic and historical analysis of sexual morality in rural Ireland augmented by comparative data from Papua New Guinea and being informed by Freud's emblematic concept of repression the author draws new conclusions that not only apply to the specific case of his Irish material but shed new light on the specific nature of an anthropological approach to the study of human societies

Small Differences Donald Harman Akenson, 1988 Argues that there are fundamental social and economic similarities between the two groups but that taboos against intermarriage segregated schools and the nature of Protestant and Catholic religious beliefs keep the Irish at loggerheads

Ireland, Sweden, and the Great European Migration, 1815-1914 Donald Harman Akenson, 2011-08-23 A comparative history of European emigration

Women and the Family in Post-famine Ireland Rita M. Rhodes, 1992 Examines the position of women within Irish society during the period 1850 to WWI focusing on the rural Irish family Reveals a high death high levels of marital fertility and a female dominated migration pattern that is uniquely Irish These demographic behaviors are interpreted as an expression of family values that by the end of the 19th century infuse Irish society These values prize land and lineage and motivate family practices that result in a preferential treatment of sons over daughters Annotation copyrighted by Book News Inc Portland OR

Family and Farm in Pre-famine Ireland Kevin O'Neill, 1984 Now available in paperback Kevin O'Neill's highly praised study of rural Ireland in the years leading up to the Great Hunger of the 1840s explicates the social economic and demographic conditions of the era He argues that overpopulation and deprivation were inextricably linked to a third variable the rapid economic development of rural Ireland

that was shaped by British interests Ireland, Sweden and the Great European Migration Donald Harman Akenson, 2011-07-25 This book is the product of Donald Akenson's decades of research and writing on Irish social history and its relationship to the Irish diaspora it is also the product of a lifetime of trying to figure out where Swedish America actually came from and why These two matters Akenson shows are intimately related Ireland and Sweden each provide a tight case study of a larger phenomenon one that for better or worse shaped the modern world the Great European Diaspora of the true nineteenth century Akenson's book parts company with the great bulk of recent emigration research by employing sharp transnational comparisons and by situating the two case studies in the larger context of the Great European Migration and of what determines the physics of a diaspora no small matter as the concept of diaspora has become central to twenty first century transnational studies He argues against the increasing refusal of mainstream historians to use empirical databases that the history community still has a lot to learn from economic historians and simultaneously that despite the self confidence of their proponents narrow economically based explanations of the Great European Migration leave out many of the most important aspects of the whole complex transaction Akenson believes that culture and economic matters both count and that leaving either one on the margins of explanation yields no valid explanation at all *Emigrants and Exiles* Kerby A. Miller, 1988 Explains the reasons for the large Irish emigration and examines the problems they faced adjusting to new lives in the United States *Ethnicity and Social Structure* Laurence Admiral Glasco, 1980 **The American Irish** Kevin Kenny, 2014-07-22 The American Irish A History is the first concise general history of its subject in a generation It provides a long overdue synthesis of Irish American history from the beginnings of emigration in the early eighteenth century to the present day While most previous accounts of the subject have concentrated on the nineteenth century and especially the period from the famine 1840s to Irish independence 1920s The American Irish A History incorporates the Ulster Protestant emigration of the eighteenth century and is the first book to include extensive coverage of the twentieth century Drawing on the most innovative scholarship from both sides of the Atlantic in the last generation the book offers an extended analysis of the conditions in Ireland that led to mass migration and examines the Irish immigrant experience in the United States in terms of arrival and settlement social mobility and assimilation labor race gender politics and nationalism It is ideal for courses on Irish history Irish American history and the history of American immigration more generally Irish Economic and Social History, 1993 *A Social History of Women in Ireland, 1870-1970* Rosemary Cullen Owens, 2005 A Social History of Women in Ireland explores the role and status of women in Ireland from 1870 until 1970 and fills an important gap in the literature of the period touching as it does on politics sociology marriage patterns religion education and work **The Sociology of Andrew M.
