Formal Methods in Policy Formulation Derek W. Bunn, 1978 This collection of papers owes its origin to a recent conference on the topic of decision analysis organised by the Royal Economic Society during the period when one of us (H T) served as Programme Secretary for the Society The papers included here were selected especially for the contribution they made to the implementation of decision analytic methods In the field of policy formulation These selected conference papers have furthermore been supplemented by several invited contributions In

order to provide a more complete exposition of the overall theme. Thus the volume now contains a set of original papers which we believe contribute significantly to the most important aspects of this topic. The work is grouped into two parts. Part I contains a critique of analytical methods in policy formulation and defines the essential characteristics of the policy process. Although we advocate the decision analysis approach insofar as it provides what we consider to be the most acceptable paradigm for rational action, we do so only on the balance of its merits based upon our personal experience of consulting work in the Decision Analysis Unit at the London Business School. The papers included in this first part represent therefore a dispassionate evaluation of the place of analytical methods in the effective formulation of policy. Part 2 looks at some of the more important aspects in the implementation of the decision analysis approach.

Public Policy Making Reexamined Yehezkel Dror, 2017-09-29. Public Policymaking Reexamined is now recognized as a fundamental treatise for public policy studies. Although it caused much controversy when it was first published for its systematic approach to policy studies, the book is acknowledged as a modern classic of continuing importance for the teaching and research of public policy planning and policy analysis and public administration. The paperback includes a new introduction updating and supplementing many of the author's original ideas. Professor Dror combines the approaches of policy analysis, behavioral science, and systems analysis in his examination of the reality of public policymaking and his suggestions for its reform. Actual policymaking is carefully evaluated with the help of explicit criteria and standards based on an optimal model approach, resulting in detailed proposals for improvement. He applies a scientific orientation to the study of social facts and theory.
