

Vertical Asymptotes

Example 1:

Graph of $f(x) = \frac{1}{x}$

Vertical Asymptote:

Line: $x = 0$ or $x = 0$

As x approaches 0 from the left, $f(x)$ goes to $-\infty$.

Line: $x = 0$ or $x = 0$

As x approaches 0 from the right, $f(x)$ goes to $+\infty$.

Example 2:

$$f(x) = \frac{x^2 - 4}{x^2 + 1}$$

Graph of $f(x) = \frac{x^2 - 4}{x^2 + 1}$

Vertical Asymptotes

Let $f(x) = \frac{p(x)}{q(x)}$ be a rational function.

$$f(x) = \frac{p(x)}{q(x)} \quad \text{if } q(x) = 0 \text{ then } f(x) \text{ is undefined.}$$

The graph of $f(x)$ has vertical asymptotes at the zeros of $q(x)$.

Ivy+ Admission Analytics for the Fox Parent ,2011 Transformational Change Efforts: Student Engagement in Mathematics through an Institutional Network for Active Learning Wendy M. Smith,Matthew Voigt,April Ström,David C. Webb,W. Gary Martin,2021-05-05 The purpose of this handbook is to help launch institutional transformations in mathematics departments to improve student success We report findings from the Student Engagement in Mathematics through an Institutional Network for Active Learning SEMINAL study SEMINAL s purpose is to help change agents those looking to or currently attempting to enact change within mathematics departments and beyond trying to reform the instruction of their lower division mathematics courses in order to promote high achievement for all students SEMINAL specifically studies the change mechanisms that allow postsecondary institutions to incorporate and sustain active learning in Precalculus to Calculus 2 learning environments Out of the approximately 2.5 million students enrolled in collegiate mathematics courses each year over 90% are enrolled in Precalculus to Calculus 2 courses Forty four percent of mathematics departments think active learning mathematics strategies are important for Precalculus to Calculus 2 courses but only 15 percent state that they are very successful at implementing them Therefore insights into the following research question will help with institutional transformations What conditions strategies interventions and actions at the departmental and classroom levels contribute to the initiation implementation and institutional sustainability of active learning in the undergraduate calculus sequence Precalculus to Calculus 2 across varied institutions

El-Hi Textbooks and Serials in Print ,2003 **Research and Development in University Mathematics Education** Viviane Durand-Guerrier,Reinhard Hochmuth,Elena Nardi,Carl Winsløw,2021-04-15 In the last thirty years or so the need to address the challenges of teaching

and learning mathematics at university level has become increasingly appreciated by university mathematics teachers and beyond by educational institutions around the world. Indeed mathematics is both a condition and an obstacle to success for students in many educational programmes vital to the 21st century knowledge society for example in pure and applied mathematics engineering natural sciences technology economics finance management and so on. This breadth of impact of mathematics implies the urgency of developing research in university mathematics education and of sharing results of this research widely. This book provides a bespoke opportunity for an international audience of researchers in didactics of mathematics mathematicians and any teacher or researcher with an interest in this area to be informed about state of the art developments and to heed future research agendas. This book emerged from the activities of the research project INDRUM acronym for International Network for Didactic Research in University Mathematics which aims to contribute to the development of research in didactics of mathematics at all levels of tertiary education with a particular concern for the development of early career researchers in the field and for dialogue with university mathematicians. The aim of the book is to provide a deep synthesis of the research field as it appears through two INDRUM conferences organised in 2016 and 2018. It is an original contribution which highlights key research perspectives addresses seminal theoretical and methodological issues and reports substantial results concerning the teaching and learning of mathematics at university level including the teaching and learning of specific topics in advanced mathematics across a wide range of university programmes.

Applying Data Science and Learning Analytics Throughout a Learner's Lifespan Trajkovski, Goran, Demeter, Marylee, Hayes, Heather, 2022-05-06. Research in the domains of learning analytics and educational data mining has prototyped an approach where methodologies from data science and machine learning are used to gain insights into the learning process by using large amounts of data. As many training and academic institutions are maturing in their data driven decision making useful scalable and interesting trends are emerging. Organizations can benefit from sharing information on those efforts. Applying Data Science and Learning Analytics Throughout a Learner's Lifespan examines novel and emerging applications of data science and sister disciplines for gaining insights from data to inform interventions into learners' journeys and interactions with academic institutions. Data is collected at various times and places throughout a learner's lifecycle and the learners and the institution should benefit from the insights and knowledge gained from this data. Covering topics such as learning analytics dashboards text network analysis and employment recruitment this book is an indispensable resource for educators computer scientists faculty of higher education government officials educational administration students of higher education pre service teachers business professionals researchers and academicians.
