

# The Epic Poem

[Inside the North Pole Family  
Room Command Center]

The walls were white and the room was round  
with candy cane trim. A preponderance was found.  
A groupe dressed in red, a red suit and mini-skirt.  
And red denim jeans with a red gingham shirt.  
And something that looked, from the top to the boot  
like a high tech, new fangled Santa Claus suit.

They stood on a map with the world at their feet, that  
shimmered with pathways. No separate countries were seen.

Everyone was staring at a video wall,  
so big it made people look skinny and tall.  
Suddenly on the monitor a flashing appeared.  
A message so urgent, all channels were cleared.

[A message appears on their wallscreen.]

Dear Santa,

Please send us a Tele-Santa Toy

So Snavely won't take our home away.

Its a mergency! Thank you.

"Dad, we've got to do something!"

The young lady turned, concerned.

Made you sense a great experience was about to be earned.

"Yes, SANDY CLAUS, I reckon that's true.

Might be a good project for your brother KLAUS, too."

It was the big guy talking. But, the beard not so long.

He looked look a jogger 'bout to burst into song.

**Supercontinent** Ted Nield,2012-02-09 The shifting continents of the Earth are heading for inevitable collision 250 million years from now all the land masses on this planet will come together in a single gigantic supercontinent which no human is ever likely to see That future supercontinent will not be the first to form on Earth nor will it be the last Each cycle lasts half a billion years making it the grandest of all the patterns in nature It is scarcely a century since science first understood how Pangaea the supercontinent which gave birth to dinosaurs split apart but scientists can now look back three quarters of a billion years into the Earth's almost indecipherable past to reconstruct Pangaea's predecessor and computer model the shape of the Earth's far distant future Ted Nield's book tells the astounding story of how that science emerged often in the face of fierce opposition and how scientists today are using the most modern techniques to draw information out of the oldest rocks on Earth It also reveals the remarkable human story of the Atlantis seeking visionaries and madmen who have been imagining lost or undiscovered continents for centuries Ultimately all supercontinents exist only in the human imagination but understanding the Supercontinent Cycle represents nothing less than finally knowing how our planet works
