Precedents In Architecture:

Precedents in Architecture Roger H. Clark, Michael Pause, 2012-02-15 PRECEDENTS IN ARCHITECTURE A TIMELY UPDATE OF THE ARCHITECTURAL CLASSIC ON DESIGN ANALYSIS Precedents in Architecture Fourth Edition provides a vocabulary for architectural analysis that illuminates the works of leading architects and aids architects and designers in creating their own designs Thirty eight leading architects are represented in this updated edition through an analysis of more than 100 buildings that are assessed using a diagrammatic technique applicable to any building This impressive collection includes fourteen new buildings and seven new innovative architects distinguished by the strength quality and interest of their designs It delivers valuable guidance in analyzing architectural history as an evolutionary process by exploring the commonality of design ideas reflected in a broad range of structures by internationally renowned architects Both novices and seasoned professionals will find Precedents in Architecture Fourth Edition to be a very useful tool for enriching their design vocabulary and for the ongoing assessment of buildings found in today's evolving landscape **Precedents in**

Architecture Roger H. Clark, Michael Pause, 1996 Precedents in Architecture provides a vocabulary for architectural analysis that will help you understand the works of others and aid you in creating your own designs Here you will examine the work of internationally known architects with the help of a unique diagrammatic technique which you can also use to analyze existing buildings In addition to the sixteen original contributors the Second Edition features seven new distinguished architects All 23 architects were selected because of the strength quality and interest of their designs *Precedents in Architecture*

Roger H. Clark, Michael Pause, 2015-08-24 **Use and Adaptation of Precedents in Architectural Design** Karina Moraes Zarzar, 2003 This is a Ph D thesis For centuries architects have used design precedents in the conception of new design solutions Whether explicitly as in the case of Le Corbusier James Stirling and Jo Coenen or implicitly as with J J P Oud Aldo van Eyk *Changing Trends in Architectural Design Education* Jamal Al-Qawasmi, 2006 *Architectural precedents, ed. by an architect [C. Davy]. Architectural precedents, 1840* *Understanding Meaningful Environments: Architectural Precedents and the Question of Identity in Creative Design* Ali Guney, 2008-10-15 Understanding Meaningful Environments Architectural Precedents and the Question of Identity in Creative Design intends to put forward a discussion on the use of precedents and the production of innovative designs as well as to discuss the relationship between precedents and identity in a world undergoing a rapid process of globalization This publication provides insights into how the strategy of making use of design precedents as a source of knowledge rather than initiating a project from tabula rasa leads to efficient effective and or innovative results based in particular on the work of Le Corbusier and Santiago Calatrava In the sense that architects ideologies and intentions did not form a main position in this account one may say that it is not a value added approach However in this publication this other side of the use of precedents is explored i.e. recollection and intention because in addition to innovations the critical use of precedents seems to help in the production of buildings places that embody a

critical notion of identity The goal of this study is to provide a reflection on the themes mentioned as well as to briefly discuss methods for precedent analysis

Architecture and the Landscape of Modernity in China before 1949 Edward Denison, 2017-02-17 This book explores China s encounter with architecture and modernity in the tumultuous epoch before Communism an encounter that was mediated not by a singular notion of modernism emanating from the west but that was uniquely multifarious deriving from a variety of sources both from the west and importantly from the east The heterogeneous origins of modernity in China are what make its experience distinctive and its architectural encounters exceptional These experiences are investigated through a re evaluation of established knowledge of the subject within the wider landscape of modern art practices in China The study draws on original archival and photographic material from different artistic genres and architecturally concentrates on China s engagement with the west through the treaty ports and leased territories the emergence of architecture as a profession in China and Japan s omnipresence not least in Manchuria which reached its apogee in the puppet state of Manchukuo The study s geographically temporally and architecturally inclusive approach framed by the concept of multiple modernities questions the application of conventional theories of modernity or post colonialism to the Chinese situation By challenging conventional modernist historiography that has marginalised the experiences of the west s other for much of the last century this book proposes different ways of grappling with and comprehending the distinction and complexity of China s experiences and its encounter with architectural modernity

The Role of Architects in Informal Settlements Nastaran Sedehi, Seyed Hossein Iradj Moeini, 2024-10-17 With over one billion people worldwide living in informal settlements and enduring substandard housing conditions these areas present one of the greatest urban challenges of our time The existence of informal settlements is deeply intertwined with global issues such as

climate change war induced displacement and colonialism As sustainability becomes a central focus in various disciplines including architecture the path to sustainable urban development lies in addressing the problems of informal settlements Architecture's relevance to this discourse is paradoxically highlighted by its perceived irrelevance Informal settlements are often overlooked as legitimate sites for architectural practice This neglect stems from two assumptions first architecture's traditional dependence on power and capital isolating the marginalised who rarely have the chance to receive architectural services and second architecture's perceived incapability to address urban scale infrastructural problems and thereby its reduction to aesthetic creativity and form making This book challenges architecture's focus on the centre and its lack of ambition for creating a pervasive impact on cities Instead it highlights the profession's potential to serve the common good and address urban scale infrastructural issues and proposes the effective engagement of architects in informal settlements Drawing on Henri Lefebvre's dichotomy of margin versus centre in urban spaces informal settlements are interpreted as spaces on the city's periphery created by the marginalised with limited access to power capital and authority By revisiting interrelated concepts such as the production of space the right to the city social architecture and spatial agency within the context of informal settlements the book claims a space for architectural practice in these areas It incorporates discussions on insurgent citizenship and critiques of the self help approach contextualising its arguments with architectural intervention precedents from around the world The book concludes with a brief manifesto on practising architecture in informal settlements The book aspires to inspire architecture students practitioners and researchers to explore the profession's potential in social problem solving and to push the boundaries of practice towards inclusiveness for all urban inhabitants

History and Precedent in Environmental Design Anatol Rapoport, 1990-07-31 This book is about a new and different way of approaching and studying the history of the built environment and the use of historical precedents in design However although what I am proposing is new for what is

currently called architectural history both my approach and even my conclusions are not that new in other fields as I discovered when I attempted to find supporting evidence In fact of all the disciplines dealing with various aspects of the study of the past architectural history seems to have changed least in the ways I am advocating There is currently a revival of interest in the history of architecture and urban form a similar interest applies to theory vernacular design and culture environment relations After years of neglect the study of history and the use of historical precedent are again becoming important However that interest has not led to new approaches to the subject nor have its bases been examined This I try to do In so doing I discuss a more rigorous and I would argue a more valid way of looking at historical data and hence of using such data in a theory of the built environment and as precedent in environmental design Underlying this is my view of Environment Behavior Studies CEBS as an emerging theory rather than as data to help design based on current theory Although this will be the subject of another book a summary statement of this position may be useful

Ways to Study and Research Urban, Architectural and Technical Design T.M. de Jong, D.J.M. van der Voordt, 2005-12-31 How can we develop a scientific basis for architectural urban and technical design When can a design be labelled as scientific output comparable with a scientific report What are the similarities and dissimilarities between design and empirical research and between design research typological research design study and study by design Is there a need for a particular methodology for design driven study and research With these questions in mind more than forty members of the Faculty of Architecture of the Delft University of Technology have described their ways of study and research Each chapter shows the objectives the methodology and its implementation in search for a deeper knowledge of design processes and an optimal quality of the design itself The authors among them architects urban planners social scientists lawyers technicians and information scientists have widely differing backgrounds Nevertheless they share a great deal The central focus is a better understanding of design processes design tools and the effects of design interventions on issues such as utility aesthetics meaning sustainability and feasibility
