

В условиях глобализации...

- С одной стороны, государства намеренно передают часть суверенитета наднациональным структурам. Например, в ЕС формируется общесоюзный «МИД» и «дипломатический корпус» – Европейская служба внешнеполитического действия
- С другой стороны, ряд исследователей придерживаются мнения, что происходит не «размыв» суверенитета, а новое наполнение его содержания. Идея о суверенитете как «бренде».

Globalisation Marjorie J. Mbilinyi, 2001 **Sustainability of NGOs and Globalisation** N. Ravichandran, 2007 In the era of globalisation successful implementation of development programmes requires an appropriate policy framework formulation of suitable plan and schemes and an effective delivery machinery Indeed development is a process of mutual endeavour that calls for the involvement of people in all the segments of society This has necessitated the emergence of institutions which can function as a catalyst between the state and the civil society while still remaining independent of direct government intervention Conversely past experiences of NGOs suggest that availability of funds by itself is no panacea for the problems of poverty backwardness and low human development anywhere in the world This has provoked a series of questions related to the behaviour of NGOs and their dynamics a phenomenon largely missing during the last two decades That is the most profound question is concerned with the very contribution of NGOs the level and degree of implementation and identified alternative development and their level of sustainability Thus no aspect of the development discourse can be carried forward today without paying attention to the work and the voice of NGOs What is needed is not the creation of a completely new sustainability outlook but the establishment of a firm contemporary agenda that builds on some of the proven strengths of the community based agenda Within this context the thinking about sustainability in particular ought to be built on a firmer and more strategically robust foundation than available now This book comprehensively reviews the key questions about aid and sustainability including the changing motives for and the purposes of providing aid the need for new aid targets distinctions among various recipient NPOs and the implications of globalisation In fact it is an attempt to understand the term sustainability in the context of globalisation through a process of transforming that understanding into organizational action

Although sustainability globalisation and organizational action can stand by themselves it may be a useful exercise to explore the sustainability concept under the globalisation setting drawing on its own experiences and best practices from India

New Regional Development Paradigms: Globalization and the new regional development Asfaw Kumssa, T. G. McGee, 2001 The era of globalization is creating profound changes in global relationships changes that are manifest at international regional national and sub national levels making traditional regional development policy obsolete and irrelevant Traditional policy needs to be redefined and reconstructed so it can capture and articulate emerging regional trends and issues The first of four volumes based mainly on Global Forum on Regional Development Policy organized by the United Nations Centre for Regional Development in Nagoya Japan this book presents a broad theoretical and trend analysis of globalization and its effects on the theory and practice of regional development The book lays out the major components that merit consideration if there is to be new regional planning in this millennium While contributors to the volume do not agree on the effects of globalization on economic growth there is a consensus in the volume that globalization presents a challenge to conventional development theories The challenge for regional planners is to examine the impact and implications of recent structural changes on regional development planning and come up with viable and pragmatic regional development strategies This volume begins to meet that challenge by laying out the major components that merit consideration The following volumes will present detailed case studies of current regional planning practices focusing largely on developing countries **Deregulation and Globalization** Daniel M. Research Committee on Armed Forces and Society. Triannual Conference, George Cristian Maior, 2002 **Labour, Globalisation & the New Economy** György Széll, Carl-Heinrich Bösling, Johannes Hartkemeyer, 2005 The dominant form of globalisation i.e financial globalisation is the biggest challenge for employees and their representations of interest If it remains largely unregulated not only the natural resources will be destroyed but also social sustainability will be prevented The negative effects of this development are first of all to be felt on the local and regional level It is here therefore where counter initiatives and strategies have to start The quality of life and working life has not necessarily increased through globalisation and the New Economy though the possibilities of improved communication via email and Internet were positively acknowledged The biggest challenge is the increasing inequality on a global scale which is produced so far by the

New Economy As education contributes to enlarge this gap it has to be adapted to the new social needs to overcome this polarisation The ongoing development must be reversed Real needs demand more spending for public than for private consumption Intermediate organisations can play a positive role in this process
