Field Methods in Archaeology Thomas R Hester, Harry J Shafer, Kenneth L Feder, 2016-09-16 Field Methods in Archaeology has been the leading source for instructors and students in archaeology courses and field schools for 60 years since it was first authored in 1949 by the legendary Robert Heizer Left Coast has arranged to put the most recent Seventh Edition back into print after a brief hiatus making this classic textbook again available to the next generation of archaeology students This comprehensive guide provides an authoritative overview of the variety of methods used in field archaeology from research design to survey and excavation strategies to conservation of artifacts and record keeping Authored by three leading archaeologists with specialized contributions by several other experts this volume deals with current issues such as cultural resource management relations with indigenous peoples and database management as well as standard methods of archaeological data collection and analysis

Archaeology And Geographic Information Systems Gary R Lock, Zoran Stancic, 2022-03-26 Geographic information systems GIS applications are viewed with increasing interest by the archaeology community and this book with its diversity of topics and authorship should be a useful resource Complementing the volume Interpreting Space Taylor It is apparent that there are fundamental differences between North American and European archaeological uses of GIS Primarily these differences lie in the types of evidence for past landscapes that are available for study in the two continents and secondly in the different approaches to archaeology and specifically the theory and practice of landscape archaeology This title centres on the role of archaeological theory in cultural resource management CRM and in GIS applications generally It showcases the important debate which takes the emphasis away from the technology of GIS and places it back within the central concerns of archaeology and particularly European archaeology Archaeology and GIS includes material on such concerns as CRM applications landscape archaeology intra site applications and explicitly theoretical concerns thus representing the state of GIS applications in European archaeology Contributions come from countries such as France Italy Hungary UK USA the Netherlands the Czech Republic Spain Slovenia and Finland

Iowa's Archaeological Past Lynn M. Alex, 2010-09-13 Iowa has more than eighteen thousand archaeological sites and research in the

past few decades has transformed our knowledge of the state's human past. Drawing on the discoveries of many avocational and professional scientists, Lynn Alex describes Iowa's unique archaeological record as well as the challenges faced by today's researchers armed with innovative techniques for the discovery and recovery of archaeological remains and increasingly refined frameworks for interpretation. The core of this book, which includes many historic photographs and maps as well as numerous new maps and drawings and a generous selection of color photos, explores in detail what archaeologists have learned from studying the state's material remains and their contexts. Examining the projectile points, potsherds, and patterns that make up the archaeological record, Alex describes the nature of the earliest settlements in Iowa, the development of farming cultures, the role of the environment and environmental change, geomorphology, and the burial of sites. Interaction among native societies, tribal affiliation of early historic groups, and the arrival and impact of Euro-Americans. In a final chapter, she examines the question of stewardship and the protection of Iowa's many archaeological resources.
