**Prehistoric Animal Domestication** Silas Donovan,AI,2025-03-29 Prehistoric Animal

Domestication explores how early human societies formed vital partnerships with animals fundamentally changing both civilizations and ecosystems The book focuses on indigenous domestication practices particularly with llamas turkeys and dogs highlighting their integration into human life for labor sustenance and companionship It argues that indigenous peoples innovative approaches were key to their survival and the establishment of sustainable ecosystems For example the domestication of llamas in the Andes reshaped trade routes and social structures The book investigates the archeological and genetic evidence surrounding these relationships revealing insights into the motivations and methods behind taming wild species Each chapter delves into specific case studies such as the unique role of turkeys in North American indigenous diets and rituals or the diverse functions of dogs in hunting and companionship By synthesizing these examples the book emphasizes common threads and divergent paths in domestication strategies examining their environmental impacts Employing an interdisciplinary approach the book bridges archeology genetics and anthropology to provide a holistic understanding of prehistoric animal domestication It progresses from an overview of domestication s biological and anthropological underpinnings to detailed case studies and concludes with the lasting legacy of indigenous practices This approach offers valuable insights into the origins of human animal relationships and the importance of sustainable practices

The Hunting Farmers: Understanding ancient human subsistence in the central part of the Korean peninsula during the Late Holocene Seungki Kwak,2017-09-30 The central hypothesis of this research is that there was a wide range of resource utilization along with rice farming around 3 400 2 600 BP This hypothesis contrasts with prevailing rice based models where climatically driven intensive rice agriculture from 3 400 BP is thought to be the dominant subsistence strategy that drove social complexity
