Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 1997-07-31 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa *Maya Zooarchaeology* Kitty F. Emery, 2004-12-31 A comprehensive work combining traditional zooarchaeological reports and various state of the art summaries of methods and theoretical perspectives This combination of detailed discussions of basic zooarchaeological data with reviews of important themes in Maya zooarchaeology emphasizes the central issues that guide our research from basic data collection through final comparative interpretation The chapters emphasize the newest developments in technical methods the most recent trends in the analysis of social zooarchaeology and the broadening perspectives provided by a new geographic range of investigations The main focus of the volume remains on fostering cooperation among Mesoamerican zooarchaeologists at the levels of both preliminary analysis and final theoretical reconstruction From Ritual to Refuse: Faunal Exploitation by the Elite of Chinikihá, Chiapas, during the Late Classic Period Coral Montero López, 2022-02-17 From Ritual to Refuse explores the faunal exploitation by the Maya elite at the site of Chinikihá Chiapas during the end of the Late Classic period AD 700-850 by applying zooarchaeological and statistical analyses to a faunal assemblage located in a basurero or midden behind a palatial structure at the core of the site *Archaeological Thought in America* C. C. Lamberg-Karlovsky, 1989 American archaeology today encompasses a huge range of approaches and draws eclectically on a multitude of academic disciplines Until now

however there has been no book seeking to separate the main strands and traditions of research and present a rounded picture of American archaeological thought in all its diversity The seventeen essays in *Archaeological Thought in America* describe recent theoretical advances and present substantive interpretations of prehistoric data drawn from a variety of cultures and time frames including Mesoamerica Central Asia India and China The contributors include many of the leading North American archaeologists of this generation

Pre-Columbian Foodways John Staller, Michael Carrasco, 2009-11-24 The significance of food and feasting to Pre Columbian Mesoamerican cultures has been extensively studied by archaeologists anthropologists and art historians Foodways studies have been critical to our understanding of early agriculture political economies and the domestication and management of plants and animals Scholars from diverse fields have explored the symbolic complexity of food and its preparation as well as the social importance of feasting in contemporary and historical societies This book unites these disciplinary perspectives from the social and biological sciences to art history and epigraphy creating a work comprehensive in scope which reveals our increasing understanding of the various roles of foods and cuisines in Mesoamerican cultures The volume is organized thematically into three sections Part 1 gives an overview of food and feasting practices as well as ancient economies in Mesoamerica Part 2 details ethnographic epigraphic and isotopic evidence of these practices Finally Part 3 presents the metaphoric value of food in Mesoamerican symbolism ritual and mythology The resulting volume provides a thorough interdisciplinary resource for understanding food feasting and cultural practices in Mesoamerica
