MacNeish, 1980 Analyzes archaeological data *The Prehistory of the Ayacucho Basin, Peru: Excavations and chronology*, 1981 Peruvian Prehistory Richard W. Keatinge, 1988-03-10 Peruvian Prehistory offers an authoritative survey of the cultural evolution of Peru from the appearance of the first inhabitants around 10 000 BC to the arrival of the Spanish in 1534 The book is divided chronologically into three main parts which examine in turn the highland and lowland zones in the Preceramic and Initial periods the development of complex society at Chavin Tiwanaku and Fluari and in the Moche and Nazca cultures and the culmination of this process the Pan Andean empire of the Incas and the way this can be studied through a combination of archaeology and ethnohistoric research A fourth concluding section deals with the often neglected tropical forest region of Peru and its formative influence on the evolution of Andean culture The first collective assessment of Peruvian archaeology for a generation this volume traces the processes of political social and economic change in Andean civilisation in a manner that will attract many with no specialist interest in Peru **Preliminary Investigations of the Archaic in the Region of Las Cruces, New Mexico**

**Pendejo Cave** Richard S. MacNeish,Jane G. Libby,Jane G. Liddy,2003 This account of the archaeology of a cave in southern New Mexico makes a dramatic contribution to the ongoing debate over how long human beings have lived in the Americas The findings presented here show that human settlement may go back as far as 75 000 years before the present whereas the long accepted Clovis dates showed humans only about 12 000 years ago MacNeish and his colleagues subjected the cave its environs and its contents to rigorous interdisciplinary investigation The first section of this volume comprises their reports on the changing environment of the area The second section concentrates on the excavation of the cave s layers presenting the results of radiocarbon dating and describing the evidence of human occupation including friction skin prints and human hair The third section discusses the cultural implications of the materials recovered and suggests how the ancient peoples may have exploited the changing environment and developed different ways of life throughout the Americas before the time of Clovis man No serious discussion of early inhabitants in the New World can disregard the findings presented in this monumental work of scholarship The South American Camelids Duccio Bonavia,2009-02-01 One of the most significant differences between the New World s major areas of high culture is that Mesoamerica had no beasts of burden and wool while the Andes had both Four members of the camelid family wild guanacos and vicunas and domestic llamas and alpacas were native to the Andes South American peoples relied on these animals for meat and wool and as beasts of burden to transport goods all over the Andes In this book Duccio Bonavia tackles major questions about these camelids from their domestication to their distribution at the time of the Spanish conquest One of Bonavia s hypotheses is that the arrival of the Europeans and their introduced Old World animals forced the Andean camelids away from the Pacific coast creating the

mistaken impression that camelids were exclusively high altitude animals Bonavia also addresses the diseases of camelids and their population density suggesting that the original camelid populations suffered from a different type of mange than that introduced by the Europeans This new mange he believes was one of the causes behind the great morbidity of camelids in Colonial times In terms of domestication while Bonavia believes that the major centers must have been the puna zone intermediate zones he adds that the process should not be seen as restricted to a single environmental zone Bonavia's landmark study of the South American camelids is now available for the first time in English This new edition features an updated analysis and comprehensive bibliography In the Spanish edition of this book Bonavia lamented the fact that the zooarchaeological data from R S MacNeish's Ayacucho Project had yet to be published In response the Ayacucho's Project's faunal analysts Elizabeth S Wing and Kent V Flannery have added appendices on the Ayacucho results to this English edition This book will be of broad interest to archaeologists zoologists social anthropologists ethnohistorians and a wide range of students
