Hardin's famous essay *The Tragedy of the Commons* he showed how a village common pasture suffers from overgrazing because each villager puts as many cattle on it as possible since the costs of grazing are shared by everyone but the profits go to the individual. The metaphor applies to global ecology; he argues making a powerful case for closed borders and an end to immigration from poor nations to rich ones. The production of human beings is the result of very localized human actions; corrective action must be local. Globalizing the population problem would only ensure that it would never be solved. Hardin does not shrink from the startling implications of his argument as he criticizes the shipment of food to overpopulated regions and asserts that coercion in population control is inevitable. But he also proposes a free flow of information across boundaries to allow each state to help itself. The time honored practice of pollute and move on is no longer acceptable. Hardin tells us: "We now fill the globe and we have nowhere else to go." In this powerful book one of our leading ecological philosophers points out the hard choices we must make and the solutions we have been afraid to consider.

Tracing Invisible Lines David Prescott-Steed, 2019-02-28. *TRACING INVISIBLE LINES* is a critical autoethnographic text built around Gregory Ulmer's concept of the *Mystory*. Dedicated to the enhancement of imagination and innovation in a digital media saturated society, Ulmer's *Mystory* is a creative research method that draws narratives from three domains of discourse: personal, professional, popular. Analysing these domains means generating fresh insight into the deep seated emblems that drive the creative disposition or invariant principle of the practice led researcher. Here the *mystoriographical* approach has mobilized an exploration of the interrelations between self and society, between memory and imagination as well as between industry driven design, arts education and experimental sound art practice, prioritizing the sonic, the perambulatory, careering. As a result, the *Mystory* fosters critical awareness of the socio cultural instruments of creative inspiration and perspiration. Reflexive in intent and experimental in approach, David Prescott Steed's hybrid writing style moves freely between art, historical, biographical and autobiographical, academic and speculative moods. This book's emphasis on an electronic investigative sound based practice finds it treading new ground between the sonic arts and the field of electracy through its addition of sound and music to the genre. This book extends the scope of studies into Ulmer's work beyond English literature and the ocularcentric arts, offering a new handbook for sonic conceptual art practice.
