Second City Politics Democratic Processes And Decision Making In Birmingham:

Second City Politics Kenneth Newton, 1976 *The Oxford Handbook of Political Leadership* R. A. W. Rhodes, Paul 't Hart, 2014-05-29 Political leadership has made a comeback It was studied intensively not only by political scientists but also by political sociologists and psychologists Sovietologists political anthropologists and by scholars in comparative and development studies from the 1940s to the 1970s Thereafter the field lost its way with the rise of structuralism neo institutionalism and rational choice approaches to the study of politics government and governance Recently however students of politics have returned to studying the role of individual leaders and the exercise of leadership to explain political outcomes The list of topics is nigh endless elections conflict management public policy government popularity development governance networks and regional integration In the media age leaders are presented and stage managed spun DDLas the solution to almost every social problem Through the mass media and the Internet citizens and professional observers follow the rise impact and fall of senior political officeholders at closer quarters than ever before This Handbook encapsulates the resurgence by asking where are we today It orders the multidisciplinary field by identifying the distinct and distinctive contributions of the disciplines It meets the urgent need to take stock It brings together scholars from around the world encouraging a comparative perspective to provide a comprehensive coverage of all the major disciplines methods and regions It showcases both the normative and empirical traditions in political leadership studies and juxtaposes behavioural institutional and interpretive approaches It covers formal office based as well as informal emergent political leadership and in both democratic and undemocratic polities **Building the Post-war World** Nicholas Bullock, 2002 Building the Post War World offers for the first time an overall account of Modern Architecture in the decade after the Second World War

Deprivation, State Interventions and Urban Communities in Britain, 1968-79 Peter Shapely, 2017-08-16 Focusing on a series of policy initiatives from the late 1960s through to the end of the 1970s this book looks at how successive governments tried to address growing concerns about urban deprivation across Britain It provides unique insights into policy and governance and into the socio economic and cultural causes and consequences of poverty Starting with the impact of redevelopment policies immigration and the rise of the inner city this book examines the pressures and challenges that explain the development of policy by successive Labour and Conservative governments It looks at the effectiveness and limits of different community development approaches and at the inadequacies of policy in tackling urban deprivation In doing so the book highlights the restricted impact of pilot projects and reform of public services in resolving deprivation as well as the broader limits of social planning and state welfare Crucially it also plots the shift in policy from an emphasis on achieving statutory service efficiencies and rolling out social development programmes towards an ever greater stress on regeneration and support for private capital as the solution to transforming the inner city **International Review of Politics and Development** , 2003 **A Contrived Countryside** Keith Hoggart, 2021-03-26 This book shows how governance regimes

before the 1970s suppressed rural prospects of housing improvement and created conditions for middle class capture Using original archival sources to reveal the intricacies of local and national policy processes weak rural housing performances are shown to owe more to national governance regimes than local under performance Looking behind the scenes at policy processes highlights neglected principles in national governance and shows how investigating rural housing is fundamental to understanding the national scene With original insights and a new analytical perspective this volume offers evidence and conclusions that challenge mainstream assumptions in public policy housing rural studies and planning

Spatial Policy in a Divided Nation Richard T. Harrison, Mark Hart, 1993 Over the last decade there has been a radical departure from the traditional role and nature of public policy for the problem regions of the UK The map of regional aids has been redrawn and there has been a major change in the package of assistance available These developments in the area of spatial policy in the UK are taking place against the background of renewed debate on the pattern of spatial economic change at both regional and sub regional level There is a particular concern that the North South divide is persisting and may in fact be widening that the benefits of the recent growth in the national economy are not being felt to an equal extent in all parts of the country and that reinforcing this trend national industrial policies such as technology policy and small firm support which are the cornerstone of the future policy environment have a pronounced regionally differentiated impact This re evaluation of the role of regional policy in the UK has been accompanied by a much closer identification of regional policy with national economic policymaking This book drawing upon the contributions of a large number of experts in the field in the UK sets the debate on the future of spatial policy explicitly within the context of the economics and politics of the North South divide Recent policy debates in the United Kingdom have highlighted two major issues which will shape future policy developments and their impact in the 1990s the persistence of pronounced regional economic and social imbalances and the shift away from traditional perceptions of the role of regional policy with a new emphasis on inner city as opposed to regional problems In this collection by leading researchers in the field the role of regional policy in the UK is re evaluated against a background of renewed debate on the economic disparities inherent in the north south divide and an assessment of the implications for future policy
