Political Economy and the New Capitalism Jan Toporowski, 2002-01-31 Political Economy and the New Capitalism examines the relevance of Sam Aaronovitch's pioneering empirical studies of British capitalism in the light of modern developments. A wide range of problems are reviewed from industrial concentration today to the co-ordination of economic policies in Europe. Aaronovitch's work on the role of finance in the British economy is the subject of sustained reflection. Individual chapters examine orthodox and left-wing criticisms of finance, exchange rate instability and employment growth and regions in the context of the European Union. This work concludes with a bibliography of the published writings of Sam Aaronovitch and collects the reflections of some of the most distinguished thinkers in economics today including Meghnad Desai, G. C. Harcourt, Pat Devine, Egon Matzner, Malcolm Sawyer, Sir Alan Budd, Jan Toporowski, Philip Arestis, Eleni Paliginis, Victoria Chick and Ben Fine.

Astrophysics And The Evolution Of The Universe (Second Edition) Leonard S. Kisslinger, 2016-08-08 The aim of this book is to teach undergraduate college or university students and adults interested in astronomy and astrophysics the basic mathematics and physics concepts needed to understand the evolution of the universe and based on this to teach the astrophysical theories behind evolution from the very early times to the present. The book does not require extensive knowledge of mathematics like calculus and includes material that explains concepts such as velocity, acceleration and force. Based on this, fascinating topics such as Dark Matter, measuring Dark Energy via supernovae velocities and the creation of mass via the Higgs mechanism are explained. All college students with an interest in science, especially astronomy without extensive mathematical backgrounds, should be able to use and learn from this book. Adults interested in topics like Dark Energy, the Higgs boson and detection of Gravitational Waves which are in the news can make use of this book as well.

Post-Keynesian Essays from Down Under Volume I: Essays on Keynes, Harrod and Kalecki G. Harcourt, Peter Kriesler, Joseph Halevi, John Nevile, 2016-04-29 Joseph Halevi, Geoff Harcourt, Peter Kriesler and J. W. Nevile bring together a collection of their most influential papers on post-Keynesian thought. Their work stresses the importance of the underlying institutional framework of the economy as a historical process and therefore of path determinacy. In addition, their essays suggest the ultimate goal of economics is as a tool to inform policy and make the world a better place with better being defined by an overriding concern with social justice.
