Global Cooperation and the Human Factor in International Relations Dirk Messner, Silke Weinlich, 2015-12-14 This book aims to pave the way for a new interdisciplinary approach to global cooperation research It does so by bringing in disciplines whose insights about human behaviour might provide a crucial yet hitherto neglected foundation for understanding how and under which conditions global cooperation can succeed As the first profoundly interdisciplinary book dealing with global

cooperation it provides the state of the art on human cooperation in selected disciplines evolutionary anthropology and biology decision sciences social psychology complex system sciences written by leading experts The book argues that scholars in the field of global governance should know and could learn from what other disciplines tell us about the capabilities and limits of humans to cooperate This new knowledge will generate food for thought and cause creative disturbances allowing us a different interpretation of the obstacles to cooperation observed in world politics today It also offers first accounts of interdisciplinary global cooperation research for instance by exploring the possibilities and consequences of global we identities by describing the basic cooperation mechanism that are valid across disciplines or by bringing an evolutionary perspective to diplomacy This book will be of great interest to scholars and postgraduates in International Relations Global Governance and International Development *Japanese Development Cooperation* André Asplund, Marie Soderberg, 2016-12-19 The world order as we know it is currently undergoing profound changes and in its wake so is foreign aid Donors of foreign aid development assistance or development cooperation around the world are already facing new challenges in the changing development architecture This is an architecture that globally seems to become increasingly forgiving of foreign aid as a win win concept that also meets the donors own national interests something that has been an unofficial Japanese trademark for many years This book examines Japan s development assistance as it transitions away from Official Development Assistance and towards Development Cooperation In this transition the strong and reciprocal relationships between Japanese development policy and comprehensive security diplomacy foreign domestic and economic policies are likely to become even more consolidated and integrated The utilization of and changes within Japanese development policy therefore affects not only recipients of foreign aid but also the relationships Japan enjoys with its allies and strategic partners as well as the relations to competing donors and rivals in the region and around the world Japanese foreign aid as such provides an extremely interesting case from where regional and even global changes can be understood Written by a multidisciplinary team of contributors from the fields of political science international relations development economics public opinion and Japan studies the book sets out to be innovative in capturing the essence of the changing patterns of development cooperation and more importantly Japan s role in within it in an era of great change This book will be of great interest to students and scholars of Japanese Politics Foreign Policy and International Relations **Intelligence Co-operation Between Poland and Great Britain During World War II: Report of the Anglo-Polish Historical Committee** Tessa Stirling, Daria Nałęcz, Tadeusz Dubicki, Anglo-Polish Historical Committee, 2005 The Anglo Polish Historical Committee was established in 2000 with the full support of the Prime Ministers of both countries The committee made up of historians and official experts from both countries was set up to identify and evaluate surviving historical records which would show the extent of the contribution made by Polish Intelligence to the Allied victory in World War II In order to assist the committee s work the Foreign and Commonwealth Office s Chief Historian

has been granted access to the archives of the British Intelligence Services The Polish historians have concentrated their efforts on those documents publicly available in the archives of for example Britain Poland and the United States of America It is hoped that through the research undertaken and now published as the Report of the Anglo Polish Historical Committee for the first time new light will be shed on the contribution of the Polish nation to Allied victory

Regional Cooperation and Conflict Management Niklas Swanström, 2002 Regional cooperation is increasingly important as a means to create peaceful relations and improve economic development The problem today is not to initiate cooperation but rather how to handle disputes and maintain good relations This is done through conflict management mechanisms CMMs in most regional cooperation structures However the interaction between such structures and regional conflict management mechanisms is not sufficiently examined and as a result no coherent theoretical model that could explain this interaction has been constructed This has meant that in many cases the interaction is incorrectly assumed with negative social and economic outcomes

Cooperative Models in International Relations Research Michael D. Intriligator, Urs Luterbacher, 1994-06-30

Cooperative Models in International Relations Michael D Intriligator and Urs Luterbacher Cooperation problems in international relations research have been associated with a variety of approaches Game theoretical and rational choice perspectives have been used extensively to analyze international conflict at a bilateral two actor level Problems of deterrence and conflict escalation and deterrence maintaining and conflict dilemma solving strategies have been studied with a variety of game theoretical constructs These range from two by two games in normal form Axelrod 1984 to sequential games It is obvious that the analysis of conflict solving strategies and metastrategies deals implicitly and some times explicitly with cooperation The emphasis on cooperation promoting strategies plays therefore an important role within rational choice analysis of two actor problems However problems of international cooperation have also been traditionally associated with literary and qualitative approaches This is especially true for studies carried out at a multilateral or systemic level of analysis The association between cooperation problems at the international level and the study of international organizations influenced by the international legal tradition have certainly contributed to this state of affairs The concept of international regime of cooperation Krasner 1983 which derives itself from legal studies has been developed entirely within the context of this literary

Hegemonic Cooperation and Conflict Qingxin K. Wang, 2000-08-30 Postwar Japan has consistently maintained close cooperation with the United States over the last four decades over such major issues as Japan's recognition of China their peace treaties and more recently Japan's resumption of the yen loan to China suspended in the wake of the Tiananmen

incident This has been in spite of Japan's well known conflict of interests in China with the United States Japan's cooperation with the United States sheds new light on some important questions which are central to current debates about the shape of the new world order in general and America's world role in particular in the post Cold War era What has been the role of American power in maintaining Japan's cooperation What have been the bases of American hegemony in the post war world How has American hegemony changed over the years Qingxin K Wang addresses and illuminates these important questions through a detailed and provocative study of Japan's relations with the United States over China policy in the last four decades
