Secondary Analysis Of The Timss Data:

Secondary Analysis of the TIMSS Data David F. Robitaille, Albert E. Beaton, 2002-09-30 The goal of this volume is to use the data from IEA's Third International Mathematics and Science Study TIMSS to investigate significant questions related to mathematics and science education as well as a number of methodological issues The authors of the papers included in this collection come from eleven of the TIMSS countries and they are prominent in their respective fields The book will be of interest to readers interested in comparative education mathematics and science education curriculum and survey research methodology A study such as TIMSS costs a great deal of money to carry out and if the true value of that investment is to be realized much more research of the kind reported in this collection is needed The papers included provide insights into the impact that TIMSS has had in the participating countries They also serve as excellent examples of the kind of follow up research that is needed

Next Steps for TIMSS National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Board on International Comparative Studies in Education, 1999-01-01 Now that the initial results of The Third International Mathematics and Science Study TIMSS have been released the Board on International Comparative Studies in Education BICSE has turned its attention to what happens next The TIMSS data are potentially useful to researchers policy makers practitioners and others interested in evidence regarding factors that influence student learning But although the study has produced a remarkable volume of intriguing data it is by no means complete Scholarly review of the initial data evaluations of claims based on the data and follow up secondary analysis based on the primary findings are all integral parts of a study of this magnitude but the bulk of this very important work has not yet begun Because of the board's serious concern that this necessary work has not been undertaken or funded it held a workshop on June 17 and 18 1998 to explore different perspectives on possible next steps The workshop was an invaluable opportunity for the board to explore issues and questions it has addressed over the years and to solidify its thinking about many of them Because the board is convinced of the importance of moving forward with the TIMSS data it presents in this report both recommendations as to what ought to be done and many of the innovative specific ideas that emerged from the workshop These recommendations reflect the board's conviction based on its many years of involvement with and deliberations about TIMSS that this study is an extremely rich resource for the policy scholarly and practice communities and that all of these groups have a responsibility to take full advantage of it The recommendations and discussion in this report are intended to assist both researchers and funders who are considering further work with TIMSS and a broader audience of researchers policy makers practitioners and others who have followed the TIMSS results and are eager to use them This report is in a sense the culmination of many years of effort for the board
