Saving The Great Swamp The People The Power Brokers And An Urban Wilderness:

Saving the Great Swamp Cam Cavanaugh,1978 **The Promise of Wilderness** James Morton Turner,2012-08-01

From Denali's majestic slopes to the Great Swamp of central New Jersey protected wilderness areas make up nearly twenty percent of the parks forests wildlife refuges and other public lands that cover a full fourth of the nation's territory But wilderness is not only a place It is also one of the most powerful and troublesome ideas in American environmental thought representing everything from sublime beauty and patriotic inspiration to a countercultural ideal and an overextension of government authority The Promise of Wilderness examines how the idea of wilderness has shaped the management of public lands since the passage of the Wilderness Act in 1964 Wilderness preservation has engaged diverse groups of citizens from hunters and ranchers to wildlife enthusiasts and hikers as political advocates who have leveraged the resources of local and national groups toward a common goal Turner demonstrates how these efforts have contributed to major shifts in modern American environmental politics which have emerged not just in reaction to a new generation of environmental concerns such as environmental justice and climate change but also in response to changed debates over old conservation issues such as public lands management He also shows how battles over wilderness protection have influenced American politics more broadly fueling disputes over the proper role of government individual rights and the interests of rural communities giving rise to radical environmentalism and playing an important role in the resurgence of the conservative movement especially in the American West Watch the book trailer <https://www.youtube.com/watch?v=JsQ6LAeYKk> *Environmental History and the American South* Paul Sutter,Christopher J. Manganiello,2009 This reader gathers fifteen of the most important essays written in the field of southern environmental history over the past decade Ideal for course use the volume provides a convenient entrance into the recent literature on the region as it indicates the variety of directions in which the field is growing As coeditor Paul S Sutter writes in his introduction recent trends in environmental historiography a renewed emphasis on agricultural landscapes and their hybridity attention to the social and racial histories of environmental thought and practice and connections between health and the environment among them have made the South newly attractive terrain This volume suggests then that southern environmental history has not only arrived but also that it may prove an important space for the growth of the larger environmental history enterprise The writings which range in setting from the Texas plains to the Carolina Lowcountry address a multiplicity of topics such as husbandry practices in the Chesapeake colonies and the aftermath of Hurricane Andrew The contributors varied disciplinary perspectives including agricultural history geography the history of science the history of technology military history colonial American history urban and regional planning history and ethnohistory also point to the field's vitality Conveying the breadth diversity and liveliness of this maturing area of study *Environmental History and the American South* affirms the critical importance of human environmental interactions to the history and culture of the region Contributors Virginia DeJohn Anderson William Boyd Lisa Brady Joshua Blu Buhs Judith

Altshuler, David E. Luberoff, 2004-05-13 A Brookings Institution Press and Lincoln Institute of Land Policy publication Since the demise of urban renewal in the early 1970s the politics of large scale public investment in and around major American cities has received little scholarly attention In *Mega Projects* Alan Altshuler and David Luberoff analyze the unprecedented wave of large scale mega public investments that occurred in American cities during the 1950s and 1960s the social upheavals they triggered which derailed large numbers of projects during the late 1960s and early 1970s and the political impulses that have shaped a new generation of urban mega projects in the decades since They also appraise the most important consequences of policy shifts over this half century and draw out common themes from the rich variety of programmatic and project developments that they chronicle The authors integrate narratives of national as well as state and local policymaking and of mobilization by mainly local project advocates with a profound examination of how well leading theories of urban politics explain the observed realities The specific cases they analyze include a wide mix of transportation and downtown revitalization projects drawn from numerous regions most notably Boston Denver Los Angeles New York City Chicago Atlanta Dallas Portland and Seattle While their original research focuses on highway airport and rail transit programs and projects they draw as well on the work of others to analyze the politics of public investment in urban renewal downtown retailing convention centers and professional sports facilities In comparing their findings with leading theories of urban and American politics Altshuler and Luberoff arrive at some surprising findings about which perform best and also reveal some important gaps in the literature as a whole In a concluding chapter they examine the potential effects of new fiscal pressures business mobilization to relax environmental constraints and security concerns in the wake of September 11 And they make clear their own views about how best to achieve a balance between developmental environmental and democratic values in public investment decisionmaking Integrating fifty years of urban development history with leading theories of urban and American politics *Mega Projects* provides significant new insights into urban and intergovernmental politics **Continuing the Mission** Howard L. Green, 2009 **A Citizen's Guide to Grassroots Campaigns** Jan Barry, 2000 Jan Barry provides a pragmatic common sense handbook to civic action Using case studies from his home state of New Jersey Barry has crafted what he calls a guidebook for creative improvement on the American dream He dissects civic actions such as environmental campaigns mutual help groups neighborhood improvement projects and a grassroots peace mission to Russia **The Genius of Earth Day** Adam Rome, 2013-04-16 The first Earth Day is the most famous little known event in modern American history Because we still pay ritual homage to the planet every April 22 everyone knows something about Earth Day Some people may also
