Sustainable Cities in American Democracy Carmen Sirianni, 2020-09-25 We face two global threats the climate crisis and a crisis of democracy Located at the crux of these crises sustainable cities build on the foundations and resources of democracy to make our increasingly urban world more resilient and just *Sustainable Cities in American Democracy* focuses on this effort as it emerged and developed over the past decades in the institutional field of sustainable cities a vital response to environmental degradation and climate change that is shaped by civic and democratic action Carmen Sirianni shows how various kinds of civic associations and grassroots mobilizing figure in this story especially as they began to explicitly link conservation to the future of our democracy and then develop sustainable cities as a democratic project These organizations

are national local or multitiered from the League of Women Voters to the Natural Resources Defense Council to bicycle and watershed associations Some challenge city government agencies contentiously while others seek collaboration many do both at some point Sirianni uses a range of analytic approaches from scholarly disciplines policy design urban governance social movements democratic theory public administration and planning to understand how such diverse civic and professional associations have come to be both an ecology of organizations and a systemic and coherent project The institutional field of sustainable cities has emerged with some core democratic norms and civic practices but also with many tensions and trade offs that must be crafted and revised strategically in the face of new opportunities and persistent shortfalls Sirianni s account draws ambitious yet pragmatic and hopeful lessons for a Civic Green New Deal a policy design for building sustainable and resilient cities on much more robust foundations in the decades ahead while also addressing democratic deficits in our polarized political culture

Bird versus Bulldozer Audrey Mayer,2021-03-09 An examination of the struggle to conserve biodiversity in urban regions told through the story of the threatened coastal California gnatcatcher The story of the rare coastal California gnatcatcher is a parable for understanding the larger ongoing struggle to conserve biodiversity in regions confronted with intensifying urban development Because this gnatcatcher depends on vanishing coastal sage scrub in Southern California it has been regarded as a flagship species for biodiversity protection since the early 1990s But the uncertainty of the gnatcatcher s taxonomic classification and whether it can be counted as a listable unit under the Endangered Species Act has provoked contentious debate among activists scientists urban developers and policy makers Synthesizing insights from ecology environmental history public policy analysis and urban planning as she tracks these debates over the course of the past twenty five years Audrey L Mayer presents an ultimately optimistic take on the importance of much neglected regional conservation planning strategies to create sustainable urban landscapes that benefit humans and wildlife alike

Walker, 2007 The San Francisco Bay Area is one of the world's most beautiful cities. Despite a population of 7 million people, it is more greensward than asphalt jungle, more open space than hardscape. A vast quilt of countryside is tucked into the folds of the metropolis, stitched from fields, farms, and woodlands, mines, creeks, and wetlands. In *The Country in the City*, Richard Walker tells the story of how the jigsaw geography of this greenbelt has been set into place. *Planning the Green City?* Mark David Owen Adams, 2006 *Hearings, Reports and Prints of the Senate Committee on Government Operations*, United States Congress, Senate, Committee on Government Operations, 1966 **Environmental Policy** Norman J. Vig, Michael E. Kraft, 2003 Describing and analyzing environmental policy in the United States on the global, national, and local levels, this book focuses on underlying trends, institutional shortcomings, and policy dilemmas that impinge on environmental controversies. Seventeen chapters are presented by Vig, political science, Carleton College, and Kraft, political science, U of Wisconsin at Green Bay. The role of public opinion and environmental activists in promoting change is analyzed, and the impact of state and community environmental policy on the federal level is discussed. The four federal institutions and their role in policy setting or blocking are examined. Broad economic, scientific, moral, and business dilemmas are explored, and finally, specific issues and controversies are considered. Annotation copyrighted by Book News, Inc., Portland, OR **Invisible Partisanship** Chang-Ho C. Ji, 2008-08-25 In 1890-1930, the election system in American cities introduced nonpartisan ballots into the cities. *Invisible Partnership* evaluates this election scheme and how it disproportionately helps Republicans win local legislative contests and shapes city councils and school boards to produce conservative and pro-developmental local policies as it places more Republicans with such political beliefs and policy preferences in the offices. Author Chang-Ho C. Ji asserts that partisan politics is a stronger force behind city and local politics than generally thought, ultimately shaping the process and results of local elections and various policy decision making in cities and local school districts.
